- (1) Our consolidated results include certain intercompany eliminations as well as asset impairment charges of \$5.5 million which are not allocated to our segment operating results. See Table 4, "Segment Information" below for an illustration of the effects of these items on our consolidated sales and operating income.
- (2) Corporate and Other includes the operations of Noa Home Inc. along with the shared Corporate costs that are benefiting both the Wholesale and Retail segments.

"Excluding the additional inventory valuation charges that we recorded, we were pleased with another quarter of strong gross margins, despite lower sales," said Robert H. Spilman, Jr., Bassett Chairman and Chief Executive Officer. "The environment for housing remains challenging and consumers are choosing to invest in experiences over their homes, a change from the Covid period. We continue to be disciplined on expenses to improve operating efficiency."

#### Restructuring Plan

The Company also announced a restructuring plan to more right-size its cost structure and to prepare it for topline growth. The comprehensive strategy builds on the strength of Bassett's brand quality, design expertise and service, and focuses on driving revenue growth and profitability long-term. The five-point plan includes:

- Drive organic growth through Bassett-branded retail locations, omni-channel capabilities, and enhanced customization positioning to expand dedicated distribution footprint.
- Rationalize US wood manufacturing from two locations into one primary location, supported by a small satellite operation.

- Optimize inventory and drop unproductive lines.
- Improve overall cost structure and invest capital in refurbishment of current retail locations.
- Close the Noa Home e-commerce business.

"Bassett Furniture has a long history of weathering economic cycles, such as the inflationary environment and slow housing market we're experiencing in 2024 – factors that led to soft demand in our second quarter," explained Spilman. "The business climate has remained difficult through the first six months of this year and may not improve in the near future. Accordingly, we are committed to returning to profitability by running a leaner operation, with priority focus on both our inventory position and the overall cost structure. We believe that our restructuring plan, expected to improve our bottom line between \$5.5 million and \$6.5 million on an annual basis, coupled with our solid balance sheet, puts us in a position to be a considerably stronger company when customer demand inevitably improves. Imparticularly pleased that our Board believes in our ability to improve operations and continue our strong cash generation by increasing our quarterly dividend by 11%."
